-Bicycle and bike-sharing

Tianjin has one of the largest bicycle populations in China. Bicycles have a zero carbon footprint and a convenient way to get around. Most main roads have bicycle lanes, usually you can find bicycle parking areas in major transport and shopping areas. All types of cycles, including mountain and electric bikes can easily be purchased at department stores, supermarkets and specialised stores.

Always remember to secure your bicycle, as bicycle theft is a common occurrence.

Ms. Sophie Olive-Kuipers wrote:

“Bike-sharing in China is quite popular and of course in Tianjin, no exceptions! Those bicycles are the best options for commuting short ways such as from home to the next subway station, to the supermarket down the road. The question is: which bicycle sharing brand or App should it be? Well, the choice needs a little reflection if you do not want to sign with each of them. Just be aware of some criteria. Make sure you choose a brand that offer an adjustable high of the saddle, a brand that can be easily found in your living/working/commuting areas and be aware that some brands offer newer and more comfortable rides than others.”

E-SMART can help you with bike-sharing registration and here are our two recommendations:
